Introductory.

IN PRESENTING THIS BROCHURE, WE DESIRE ONLY TO GIVE IN A BRIEF MANNER SOME OF THE PROMINENT FEATURES OF THE STEUBEN SANITARIUM, NOT IN ANY WAY WISHING TO MISLEAD BY EXAGGERATED STATEMENTS AND ILLUSTRATIONS, AS IS SO OFTEN DONE, FULLY BELIEVING THAT A TRUTHFUL REPRESENTATION IS PREFERABLE, THOUGH IT MAY NOT BE APPRECIATED BY THOSE WHO ARE LOOKING AFTER THE MIRACULOUS AND IMPOSSIBLE. WE MUCH PREFER GUESTS TO BE AGREEABLY DISAPPOINTED THAN OTHERWISE. WE CANNOT, IN A FEW WORDS, GIVE ANYTHING LIKE A COMPREHENSIVE IDEA OF THE MANY DETAILS OF A SUCCESSFUL INSTITUTION, AND THEREFORE TRUST WE MAY BE PARDONED IF WE ONLY ALLUDE TO THE ESSENTIAL FEATURES WHICH GO TO MAKE THE STEUBEN SANITARIUM WHAT IT IS, A SCIENTIFIC MEDICAL AND SURGICAL INSTITUTE.

LOCATION OF BUILDINGS.

The Steuben Sanitarium stands upon an eminence that commands a view as rare as it is beautiful, extending for miles in either direction. Nature has here spread her holiday garb over one of the grandest valleys in the world, which, in conjunction with the surrounding hills, completes a varying picture upon which the eye of the invalid may rest during the period of treatment and convalescence.

Fourteen hundred feet above the level of the sea, high above the valley it overlooks, all malarial and depressing influences are avoided, and the purest of air obtained.

Located within the limits of Hornellsville, it is yet sufficiently removed to avoid the smoke and dust of the city, which stretches away to the right over two hundred feet below, while from the spacious verandas and balconies of the main building a magnificent view of the Canisteo Valley is obtained.

Much has of late been written in regard to that part of the country in which Hornellsville is located, it being considered particularly exempt from tubercular disease. Hinsdale, of Philadelphia, has collected statistics proving that not more than one to one thousand die from consumption in this region annually. When we consider that the lives of one-fifth of the population of the globe are destroyed by some form of this dread scourge, this fact becomes of serious importance to those seeking restoration to health.

The vital statistics of the past year show that Hornellsville has the lowest mortality of any city in the State, being only nine and seventy-five one-hundredths to one thousand population, while that of the entire State is fourteen and seventy-five one-hundredths to one thousand. It is, therefore, a most desirable place for a health institution, as the sanitary surroundings and natural advantages are such that in this locality many are restored from sickness to health without the use of medicines.

On an
Eminence
Natural Park
of
Ten Acres

The location of the buildings is exceedingly fortunate, and cannot well be surpassed for charming surroundings. A beautiful park of ten acres in the rear affords a pleasant resort for invalids and convalescents in summer, while ample provision for entertainment and exercise is furnished indoors during the winter months.

BUILDINGS.

Perfect Heat
and
Ventilation

Of modern design, the buildings are among the most complete for the purpose of any in this country, being noted particularly for their heating and ventilating facilities. The temperature of the rooms is kept constantly at 72° Fahr. Pure air from without is forced through an asbestos shaft, seven feet in diameter, by means of a huge fan, propelled by steam. As it leaves the fan it is heated on its way, to the degree desired, by passing over steam radiating pipes. It is then carried underneath the lower hall, being forced through flues passing up through the massive brick walls on either side the halls, entering each room through a register, and is then carried out by another series of flues to the large ventilators on the roof of the building. One, therefore, breathes the same purity of atmosphere as in the open air, and, if desired, various antiseptics can be introduced with the air in any of the rooms by placing them in the registers. There are no pounding radiators with their leaking valves and no coal gas from defective furnaces or stoves.

Temperature
Does Not Vary
more than
Two Degrees

Same
Purity of Air
as Out of Doors

By a slight modification of the process the temperature is controlled during the heat of summer, so that throughout the year the same degree is maintained. The system is so perfect that the air can be completely changed in every room within ten minutes, while within the Sanitarium walls winter is unknown.

Cooled in
Summer; Air
Changed
every Ten
Minutes.

Fire-proof
Brick and
Stone
Structures

The magnificent *brick and stone fire-proof structures* are lighted by a large electrical plant, belonging to the institution. The only fire in the building being in the kitchen, the walls of which are covered with asbestos, destruction by fire is practically impossible.

FAIR VIEW IN WINTER.

THE OAKS.

All modern appliances and conveniences, such as electric call bells, long distance telephone, safety elevator, etc., have been supplied. There are also to be found spacious, well furnished parlors, offices, gymnasium, billiard hall, laboratory, reception, reading, smoking, amusement and operating rooms, and in fact all that pertains, or adds to the pleasure and well-being of the guests.

ORGANIZATION.

On the first day of August, 1895, the present company, consisting largely of physicians, purchased the elegant property described, which was built and furnished by the "Hornell Sanitarium Co.," four years since. The company consists of men of means and ability who are young or in the prime of life. They have spared neither time nor money to make the Steuben Sanitarium as nearly as possible a perfect medical and surgical institute, having organized and equipped it for the purpose of affording to patients the most modern medical and surgical treatment known to the world. It is, therefore, a place where patients can avail themselves of the skill of those eminent in the profession, and at the same time have all the comforts of a luxurious home.

It is not designed to take the place of the family physician, but to aid him in providing means and appliances which the general practitioner does not possess, and to care for a class of patients that his and their surroundings and conveniences often make difficult for him to treat with the best results; it being, as is well known, necessary many times to have the patient under the constant observation of the physician, which cannot be done in private practice.

While the Sanitarium is provided with all approved appurtenances for treating the most difficult cases, and has the benefit of some of the leading physicians and surgeons of this country, yet it is not in the least objectionable to those who might only need the care of the ordinary institution, as serious medical and surgical cases have their separate apartments, and are not in any way obnoxious to other guests.

OFFICE OF SUPERINTENDENT.

OFFICE OF HOUSE PHYSICIAN.

MAIN HALL.

BUSINESS OFFICE.

Superintendent;
Opportunities
for
Investigation

The Superintendent, Dr. J. E. Walker, has had an extensive general practice of twenty years in Western New York. Realizing the necessity of a closer association with patients, as well as that many cases cannot be treated successfully in their own homes on account of their surroundings, and that a combination of talent and a thoroughly equipped institution is needed to obtain the best results, he began the study of institutional work five years ago. After spending some time in the various hospitals of London, Berlin and Vienna, as well as visiting many health resorts on the continent, he returned home, made a tour of our own country, studying its climatology, etc., after which he decided to locate in the Steuben Sanitarium, at Hornellsville, N. Y., and put into use the knowledge thus obtained in regard to the proper care of invalids. He was a member of the "International Medical Congress," held in Rome, Italy, 1894. He is also a member of the "American Medical Association," the "New York State Medical Association," "Steuben County Medical Society," "Hornellsville Medical and Surgical Association," as well as being an honorary member of several other medical bodies within the State.

ADMISSION OF PATIENTS.

Alcoholics,
Insane
and Those
Having
Contagious
Diseases
Not Taken

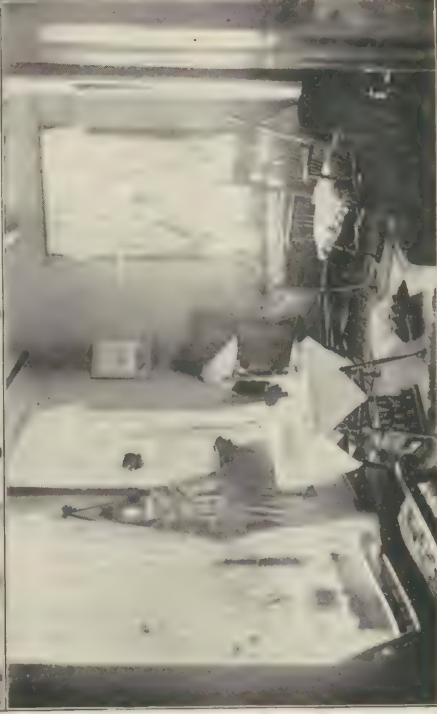

All classes of cases are accepted other than alcoholics, the insane or those having contagious diseases. A thorough examination is made of each case upon admission, including family and personal history, present physical condition as regards nutrition, weight, spirometry, dynamometry, etc., together with an accurate physical examination of every organ of the body, while when necessary microscopical and chemical analyses of the various secretions are conducted in the laboratory. All the facts obtained are recorded and kept as a matter of reference.

GENERAL DISEASES.

Examination
of
Patients
Every
Monday

On Monday of each week all patients are carefully examined by the medical staff, and any change in their condition noted; after consultation, a plan of treatment is agreed upon to be carried out by the house physicians during the following week. There is no routine practiced in the treatment of patients, each case being studied separately and prescribed for accordingly, an intelligent appreciation of the needs of each individual being essential to a successful management. Drugs are employed in a rational manner, whenever there exist positive indications for their use. It often happens that patients have been drugged so generously that the system has become saturated and fails longer to respond to treatment until all foreign substances have been eliminated. Besides drugs, many other agents are intelligently employed which greatly assist nature in her efforts of repair.

Drugs
Employed
when
Necessary

RHEUMATIC CONDITIONS

Rheumatism

are successfully treated by careful regulation of diet, hydrotherapy, passive motion and electricity.

DISEASES OF THE DIGESTIVE ORGANS

Diseases
of the
Digestive
Organs

receive close attention. Chemical and microscopical examinations of the contents of the gastro-intestinal tract are made when necessary. Test meals are often given and the stomach subjected to lavage in order to ascertain the desired information in regard to gastric digestion, as well as to enable the physician to make a correct diagnosis of obscure stomach troubles.

Special
Diet

A special dietary is prescribed to meet the indications of the individual case.

ONE OF THE PARLORS.

SURGICAL DISEASES.

Surgery

The advantages offered by this Sanitarium to those needing surgical care cannot be over-estimated. It is now considered necessary to have patients thoroughly prepared for severe surgical operations, by rigid hygiene, careful regulation of diet, proper baths to induce excretion and elimination, and at the same time to build up the system by massage and general tonic treatment so as to enable the patient to resist the shock of operation, and better prepare for rapid convalescence. The necessary means for such preparation which are here afforded cannot be found in any general hospital. The value of these preparatory measures cannot be overstated. They may in some cases insure success where otherwise absolute failure would ensue.

Preparation of Patients

Results of Surgical Work

The results of surgical work done in the institution fully justify the stress laid upon due preparation of the patient, and warrant the statement that nowhere in America or Europe can better work be done or with a more encouraging prospect of success.

Operating and Surgical Rooms

Commodious, well lighted, thoroughly furnished operating rooms are located on the fourth floor, being easily reached by an elevator, where are also twenty rooms where serious surgical cases are kept after operations, until they are able to be about the institution with other guests.

Antiseptic Surgery

The most intricate surgical operations are here performed by the consulting and house surgeons. Every facility for carrying out fully the principles of antiseptic surgery is employed. Dr. Roswell Park, of Buffalo, N. Y., one of the consultants, operates frequently, and his services can be had at any time desired.

DISEASES OF WOMEN.

Diseases of Women Successfully Treated

With trained assistants in the use of baths, massage, electricity and physical culture, much is done for the relief and cure of women suffering from diseases peculiar to their sex. In addition to these measures, medical and surgical means

AMUSEMENT ROOM.

are employed when necessary. The various abdominal operations for the removal of tumors and growths of different kinds, together with all plastic operations, are done to relieve suffering women. The services of Dr. M. D. Mann, of Buffalo, N. Y., one of the consultants, can be arranged for at any time.

DISEASES OF THE NERVOUS SYSTEM.

Nervous Diseases

Much is done in the department of nervous diseases by the use of the different forms of electricity and hydrotherapy. The methods of treatment employed are those which are the result of careful investigation. Cases of neurasthenia or nervous exhaustion are cared for in a manner which affords much benefit. The various diseases of the nervous system are carefully studied and treated according to the peculiarities of the individual case. Paralytics are often restored to health by the application of massage, passive motion, electricity, the use of the walking machine, etc. Dr. Floyd S. Crego, of Buffalo, N. Y., an expert in this department, will visit patients at the institution when desired.

Paralysis

DISEASES OF THE RESPIRATORY ORGANS.

Diseases of the Nose, Throat and Lungs

On the office floor is a room furnished with a large compressed air reservoir, supplied by a Marsh steam pressure pump; also a quantity of nebulizers, vaporizers, atomizers, etc., filled with agents for the treatment of diseases of the *nose, throat and lungs*. Oxygen cylinders and the various antiseptics which have been found beneficial are at hand. The pure air provided by the system of ventilation, together with the facilities for introducing various volatile healing and cleansing agents into the rooms with the air that is forced through the building by means of the fan system, and the fact that the surrounding country is comparatively free from consumption, gives those who are suffering from coughs and diseases of the organs of respiration the best opportunity for a cure before it is too late.

Nose and Throat Room.

FAN ROOM.

BOILER ROOM.

ENGINE ROOM.

DISEASES OF THE HEART.

Diseases
of the
Circulation

Diseases of the heart, with their complications, are carefully studied, and much benefit is derived from the proper use of hydrotherapy, which has recently become so popular throughout Europe in the treatment of heart troubles.

DISEASES OF THE KIDNEYS.

Bright's
and
other
Kidney
Diseases

The various diseases of the kidneys are treated in a scientific manner, the secretion always being collected for twenty-four hours, when a chemical and microscopical examination is made, and the correct treatment and diet prescribed. By the use of proper baths the skin is made to do a large portion of the eliminating, giving the kidneys rest; thereby they can often be restored to their physiological condition.

HYDROTHERAPY.

Baths,
Electricity,
etc.

While the surrounding country abounds in mineral springs, yet no "all-healing waters," which can be manufactured by any chemist, no "secret nostrums," no "hobbies," are introduced, the management preferring to depend solely upon scientific principles applied in the treatment of disease, resting upon the facts that with the admirable sanitary surroundings, an institution furnished with all modern appliances for the care of the afflicted, and a combination of medical talent which is equal to any in the United States, all is done that can be to restore the sick to health.

Pure
Water

Pure spring water, coming from the hills four miles away, is used in abundance; also water from a well nearly two hundred feet in depth, which contains traces of sulphur, iron, and sulphate of magnesium, together with some other constituents of minor importance. All the water used for drinking and cooking purposes is forced through a Pasteur filter, and is therefore rendered absolutely pure.

ONE OF THE DINING ROOMS.

Bath Rooms	Two large suites of bath rooms, thoroughly furnished with every improvement, are on the first floor, where are given over fifty different treatments, as prescribed each morning by the house physicians.
Electrical Rooms	Between the two series of rooms is located an electrical room, provided with the various electrical appliances, where is also to be found a thermo-electric or Moliere cabinet bath, where the patient can sit on a metallic stool, which is adjusted to the height of the individual, so that the head is free above the cabinet, the remainder of the body being within. To this is attached either the galvanic or faradic current, as desired, the feet of the patient being usually placed in a foot bath to which one of the poles of the battery is attached.
Moliere Bath	In addition to this the temperature of the cabinet is raised to any degree. A gentle or profuse perspiration is produced by a combination of electricity and heat. The benefits derived from this combination are remarkable in certain cases. Every form of electricity and hydrotherapy which has been found beneficial is utilized to the advantage of the individual case under treatment. Attendants thoroughly educated in their special work are always present to give whatever treatments are ordered by the physicians, such as Turkish, Russian, tub, sitz, sponge, needle, vapor, brine, medicated and other baths, as well as the various douches, sprays, salt, oil and dry rubs, inunctions, massage, fomentations, lavage, medicated inhalations, etc.
Educated Attendants	Many diseased conditions are caused by auto-intoxication or self-poisoning due to an absorption of toxins or poisonous elements developed within the body, which should be eliminated by the various excretory organs. All diseases due to defective elimination and excretion are materially improved, and usually cured, by the systematic, well regulated use of baths, and the various treatments prescribed in connection with this department.
Self- poisoning	

VIEW OF CITY FROM SANITARIUM.

GYMNASIUM.

THE CUISINE.

The company has been fortunate in securing the services of Mr. Wm. A. Rodgers, whose reputation as a caterer is widely known, from his successful management of the Erie Dining Hall at Hornellsville, N. Y., as well as having had charge of some of the finest hotels of the Union Pacific System. His life has been a constant study of dietetics, and his extensive acquaintance with the public is such that his name alone gives a sufficient guaranty of the perfection with which the non-medical departments are conducted, he having the entire management of the house under the general supervision of the superintendent.

Mr.
W. A. Rodgers

No "fads" are introduced, but a nutritious dietary which is digested and assimilated with the least possible expenditure of vital force is always provided. The table is liberally supplied with the choicest varieties of food which the market affords. Special diet is prescribed as is deemed necessary by the physicians.

No "Fads"

The Table

The milk, cream and butter are supplied from the "Sanitarium dairy," which consists of a choice lot of Jersey cows that are carefully inspected at stated intervals by a scientific veterinarian, and are absolutely free from tuberculosis or any other disease.

Sanitarium
Dairy

REST AND RECREATION.

The institution is so arranged that those desiring a change from the busy cares of life can find all the comforts of a first-class hotel, with the addition of perfect hygienic surroundings and beautiful scenery. Accommodations can be obtained at reasonable rates.

Recuperation

LOCATION OF HORNELLSVILLE.

In Western New York on the direct line of the " Picturesque Erie," at the junction of the three divisions, one leading to Chicago, one to Buffalo, and the other to New York ; also reached by a branch of the " Lackawanna," the main line of which is but fourteen miles distant.

Easy
of Access

RATES.

For examination and consultation, \$5.00. If necessary to make chemical and microscopical analyses of the secretions, \$10.00 If the patient remains more than a fortnight, no charge is made for examination.

Examinations

No extras are charged as in other institutions, except for surgical operations and the constant attention of private nurses. The price agreed upon includes room, board, professional attendance, medicines, general nursing, baths, massage, physical culture, electricity, etc., varying with the amount of work necessary to be done, and the accommodations furnished, being from \$2.00 a day upward, an average price being about \$20.00 per week.

No
Extras

Prices.

Guests will notify the superintendent on what train they will arrive, when a carriage will be awaiting them at the depot. Any further information desired can be obtained by addressing the superintendent,

DR. J. E. WALKER,

HORNELLSVILLE, N. Y.

chematic Drawing Illustrating the Heating and Ventilating of the Steuben Sanitarium. ❀ ❀ ❀ ❀ ❀

Pure air from without is forced over steam radiating pipes, which heat it to the temperature desired, by means of the fan which is seven and one-half feet in diameter and revolves ninety times a minute. The tempered air is then carried along the asbestos shaft underneath the lower hall, thence up through the brick walls on either side the halls and into the rooms by way of registers. The air which has been used is constantly passing out through the ventilating flues which have an opening from each room; it is then conveyed to the large ventilators on the roof of the building, and is therefore kept constantly in motion and is as pure as out of doors, being completely changed as often as every ten minutes. The temperature need not vary throughout the building more than two degrees Fahr. during the year—a feature not attained by any other institution in the United States.

SOUTH TEXAS COAL AND OIL CO..

NORMAN G. KITTRELL, PRES.

HENRY TOUJOUSE, VICE-PRES.

HOUSTON, TEXAS, April 5, 1897.

Dr. J. E. Walker, Hornellsville, N. Y.

From
Henry Toujouse

Dear Sir.—Although several months have passed since I left the Sanitarium I trust it is not too late for me to express my appreciation of the many kindnesses shown my wife and self while inmates of your institution, and also to thank you for the restoration of my health, which I consider is due to the careful and wise treatment I received at the hands of yourself and the medical staff of the Steuben Sanitarium.

Should circumstances ever require it I shall consider myself fortunate if I am able to once more place myself under your care. In the meanwhile I assure you I shall take pleasure in recommending the Steuben Sanitarium to all who may be in need of medical attention or rest, feeling that I cannot too highly endorse the management and perfect equipment of the institution.

With best wishes, I am, yours very truly,

HENRY TOUJOUSE.

GEORGE T. BAILEY.

543 NIAGARA ST., BUFFALO, N. Y.

March 15, 1897.

My Dear Dr. Walker.—Twice when I called at your office you were busy, so I write to show my appreciation of your treatment of my sister.

From
George T. Bailey

I did not remain long enough to become accustomed to your summer temperature, but am not as greatly surprised at my sister's recovery as I would have been if I had not been made familiar with your scientific, modern, and, permit me to say, generous methods. I saw nothing objectionable, but did see the great desire of every one connected with your Sanitarium to be courteous and self-sacrificing.

Your table tempted and satisfied me, and I hope you are making money—am sure your patients are. Since my visit and thorough inspection, I have ceased being impatient and anxious, and am heartily glad of your success.

Very sincerely yours,

GEORGE T. BAILEY.

LAW OFFICE OF

E. W. CHAMBERLAIN.

BELMONT, N. Y., March 11, 1897.

Dr. J. E. Walker, Hornellsville, N. Y.

From
Hon. E. W.
Chamberlain

My Dear Doctor.—I shall not soon forget the pleasant vacation I spent last summer, with my wife, at the Steuben Sanitarium, nor the benefits derived from the treatment, under your direction, to my rheumatic right arm. I can commend the institution to the overworked as a most agreeable place to rest and recuperate, as well as to those more seriously afflicted, being provided with most skillful physicians and attendants.

I have had occasion since then, to drop in upon you several times to get "patched up" a little, and always came away benefitted.

Mrs. C. joins with me in kind remembrances to the old friends who may still remain at the Sanitarium.

Very truly,

(Hon.) E. W. CHAMBERLAIN.

ALFRED, N. Y., March 11, 1897.

Steuben Sanitarium, Hornellsville, N. Y., is all that it claims to be, a Sanitarium, a hospital, a home without the unpleasant features of a hospital.

From
Rev. L. C.
Rogers

Having enjoyed the benefits of this institution, I take great pleasure in recommending it to all who seek a pleasant health resort.

Its management is all that could be desired. Its superintendent, J. E. Walker, M. D., and his staff are affable and courteous gentlemen, as well as skillful physicians and surgeons.

(Rev.) L. C. ROGERS, A. M., D. B.

Prof. of History and Civics,
Alfred University.

CLARENCE A. FARNUM.

COUNSELOR AT LAW,

WELLSVILLE, N. Y., February 10, 1897.

Dr. J. E. Walker, Hornellsville, N. Y.

My Dear Sir—I am informed that the Steuben Sanitarium contemplates soon placing before those needing aid from such an institution the advantages you can offer. I am glad you are doing this, for I trust it will be the means of benefiting others as I was benefitted. When I went with you the 30th of last Oct., not having been able to walk for more than 15 weeks, and then only to move with crutches with the greatest pain and difficulty, I had no thought I should ever use my left limb again in walking. Through your care and treatment I have substantially regained the use of my leg, and I shall always have a grateful feeling for your work and that of your institution.

With best wishes for your success. I am, very truly yours,

(Hon.) CLARENCE A. FARNUM,

Ex-Judge of Allegany Co.

From
Hon. Clarence
A Farnum

531 Jefferson Ave., GRAND RAPIDS, MICH., Nov. 5, 1896.

Dr. J. E. Walker, Hornellsville, N. Y.

I feel that a ten weeks' sojourn at the Steuben Sanitarium entitles me to say a word for the benefit of those seeking medical aid or rest from over-work.

Overlooking a beautiful valley in the foot hills of the Alleganies, this institution seems to offer a haven of rest to those seeking restoration to health; its skilled and conscientious physicians offer the best medical and surgical treatment known.

EMMA PALMER,

Principal Normal School.

From
Emma Palmer

GEO. W. POUND.

LAW OFFICES.

LOCKPORT, N. Y., Feb. 8, 1897.

My Dear Doctor.—I cannot neglect to express to you, in behalf of my wife and her sister, our thanks and appreciation of your many kindnesses to them while at the Sanitarium.

For thoughtful attention, unremitting care and general management your institution should be most highly commended.

Mrs. Pound also desires to be remembered to Dr. Dawson (house physician), and to other friends.

Very truly,

GEO. W. POUND,

District Attorney of Niagara Co.

From
Geo. W. Pound

1939 Euclid Ave., CLEVELAND, O., Mar. 10, 1897.

To Whom It May Concern.—Having been at the Sanitarium 24 weeks and received benefit beyond my expectations, I can cheerfully recommend the institution to any suffering from ill health.

From
F. T. Morgan

F. T. MORGAN.

EPWORTH MEMORIAL

METHODIST EPISCOPAL CHURCH.

CLEVELAND, O., March 23, 1897.

A residence of two years in Hornellsville enables me to speak definitely concerning the superb location, modern buildings, complete facilities and pleasant surroundings of the Steuben Sanitarium. There is tonic in the pure air and inspiration in the views afforded from the sun-crowned hillside; but more important than this are the high standing and undoubted abilities of the house and consulting staffs of physicians and surgeons, many of whom rank first in Western New York. I very, very cheerfully commend the institution to those seeking a health resort.

(Rev. WARD BEECHER PICKARD.

From
Rev. Ward
Beecher Pickard

122 Euclid Ave., CLEVELAND, O.

The Steuben Sanitarium came to my notice through my friend, Dr. A. E. Persons, of Buffalo, N. Y., and I do not hesitate to indorse both the institution and the medical gentlemen in charge. Patients whom I have sent to the Sanitarium have been given good general care; their contentment and happiness have been maintained to a high degree, and the scientific application of therapeutic agents has been to my complete satisfaction.

From

J. A. Stephens,
M. D.

J. A. STEPHENS, M. D.

59 Griffith St., ROCHESTER, N. Y., Mar. 2, 1897.

I am constrained by the blessings received through the efficiency and skill of Dr. Walker, to say for the benefit of others a few words in praise of this most delightful place. Our daughter was suffering from a severe spinal trouble which baffled the skill of home physicians. We incidentally heard of the Steuben Sanitarium, and after a brief visit there became convinced that it was the place for her. Helpless, having lain many weeks with one limb completely paralyzed, she was taken there, and it was our pleasure in five weeks' time, upon our first visit to her, to see her walking across the veranda; her spinal trouble disappeared entirely and she was restored to us in a normal condition.

From

Mrs. L. E.
Morley

It has been my privilege to spend much time at this beautiful place, where I could observe the progress of others in whom I had become interested, and was often astonished to see them leave after a few days or weeks, either restored to health or greatly improved. Most serious and difficult operations are constantly being performed, and never have I known one proving fatal.

There are no flattering delusive hopes held out to deceive either patients or friends. It is not only a home for the sick, but conducive to rest for those who are exhausted from every-day life, and its many wearisome cares. To my knowledge there is no other Sanitarium where for the same prices one can obtain so many comforts, and even luxuries, as at this institution.

MRS. L. E. MORLEY.

CHAMBERS OF

FRANK HURD ROBINSON,

County Judge of Steuben County.

HORNELLVILLE, N. Y., Feb. 1, 1897.

To Those Desiring Health, Rest or Recreation.—I claim the right to express my appreciation of the excellent work done at the Steuben Sanitarium. It could not be otherwise when we take into consideration the ability and character of those connected with the institution. The consulting staff comprises some of the best talent in this country. The house staff is headed by the superintendent, Dr. J. E. Walker, who has had extensive opportunities for investigation both in this country and Europe; having spent some time in the Brompton Hospital for Diseases of the Chest, London, Eng., taking special courses in bacteriology and microscopy in King's College, London; investigating the methods of the Koch Institute of Berlin, Germany, also doing special work in the Vienna Polyclinic, in diseases of the respiratory organs, together with a large general experience of sixteen years before taking up institutional work, thus peculiarly fitting him for the position he occupies.

These features, together with the good business management of the company, have given the Sanitarium the popularity it so justly deserves. Both friends and patients are highly gratified that the institution has been made such an excellent health resort under its present management.

Very truly yours,

(Hon.) F. H. ROBINSON

OFFICE OF

J. O. JACKSON, M. D.

25 W. Main St., NORTH EAST, PA., Mar. 15, 1897.

Dr. J. E. Walker, Hornellsville, N. Y.

From

J. O. Jackson,
M. D.

Dear Doctor.—I take pleasure in informing you that Mrs. Jackson continues to improve since her return home, as do the other patients who have returned to me from your Sanitarium; after having four of them treated at your institution I am in a position to judge of the work done, and in each case it has been eminently satisfactory.

Very truly,

J. O. JACKSON, M. D.

OFFICE OF
DR. G. H. WITTER.

WELLSVILLE, N. Y., April 3, 1897.

To Those Suffering from Surgical Diseases.—My mind has been especially attracted to the treatment of surgical cases in the Steuben Sanitarium. The management of this department is in every particular the up-to-date science of surgery.

The building-up process, so to speak, and placing the patient in the best possible condition to undergo the ordeal of a serious operation, must commend itself to every one familiar with surgical work. The skill always present and available, and the results in many of the most critical cases, prove beyond question that there is no place where better work can be done or more brilliant results anticipated.

CHARLES PHILLIPS, M. D., PRES.
ROY DUNHAM, M. D., SECY.

HORNELLVILLE, N. Y., Nov. 6, 1894.

Resolved. that the Hornellsville Medical and Surgical Association extend to James E. Walker, M. D., Superintendent of the Steuben Sanitarium, its best wishes and earnest support, knowing him to be devoted to scientific research, as well as being a practical physician and surgeon; having availed himself of opportunities afforded for clinical observation and experience both in this country and Europe; we feel that he is well equipped for having charge of an institution that is in perfect harmony with the profession.

WHOLESALE AND RETAIL DRUGGISTS.

HORNELLVILLE, N. Y., July 5, 1896.

J. E. Walker, M. D., Steuben Sanitarium.

Dear Doctor—I was sick, worn out, over-worked; I went to your Sanitarium last January, remained there six weeks, came away a new man. Professional treatment, baths and nursing were everything I could expect. Aside from this was the home-like air about the whole institution. Your place is an ideal one.

I came away with a feeling of regret, having left a place that had done more for me than I expected could be done in so brief a time.

Very truly yours,

GEO. T. REED.

THE MANSE.

HORNELLVILLE, N. Y., Mar. 16, 1897.

I can sincerely and heartily commend the Steuben Sanitarium to all who seek rest and health. Its elevated site, its extensive and picturesque prospects, its comfortable rooms, its complete equipment of baths, etc., and its competent staff of physicians, combine to make it one of the most attractive and successful of rest and health resorts.

(Rev.) EDWARD M. DEEMS, Ph. D.,
Pastor First Pres. Church.

CLEVELAND, O., Mar. 1, 1897.

Dr. J. E. Walker, Superintendent.

My Dear Doctor Walker.—It gives me much pleasure to testify to the worth of the Steuben Sanitarium as a pleasant home for those needing rest, and as a place of efficient medical treatment. This testimony is freely given on behalf of myself and my wife, both of whom have experienced the benefits here received.

Yours sincerely,

(Rev.) ALBERT G. UPHAM, D. D.,
Pastor First Baptist Church.

CITIZENS NATIONAL BANK,

CHARLES CADOGAN, PRES.

HORNELLSVILLE, N. Y., March 20, 1897.

To the Public.—This letter is more particularly intended for those who are looking for a place to regain lost health and rest from over-work, either mental or physical. To all such I would recommend the Steuben Sanitarium.

It is in one of the most beautiful locations in Western New York. Its medical and surgical staff is composed of men that stand at the front in their profession, and are men who have a reputation not confined to the State of New York. Its business management is in the hands of a number of our best and most successful men. Their efforts are making this institution second to none in the country.

Respectfully yours,

CHARLES CADOGAN,

Pres. Citizens National Bank.

OFFICE OF

DR. C. S. PARKHILL.

9 Center St., HORNELLSVILLE, N. Y.

The Steuben Sanitarium is essentially an institution conducted for the successful treatment of chronic diseases by all the modern appliances of well known value, under the management of thoroughly capable physicians, conducted upon strictly professional lines.

Dr. J. E. Walker, the superintendent, is one of the most capable and conscientious physicians of my acquaintance. His extensive experience, together with his opportunity for study, both in this country and Europe, renders him eminently qualified for the position he holds.

Very truly,

C. S. PARKHILL, M. D.

Ex-Pres. of the New York State Railway Surgeons Association, 1896.

MAYWOOD ART TILE WORKS.

MAYWOOD, N. J., Jan. 11, 1897.

Dr. J. E. Walker, Steuben Sanitarium.

My Dear Sir.—During the long sickness of my son, I had occasion to get acquainted with several sanitariums far and near by, and I gladly state that I have found none in which I, as well as my poor boy, was so well pleased and cared for in every respect as in your Sanitarium.

Whenever opportunity offers, I will not hesitate to recommend your institution in the most emphatic terms.

Your Sanitarium has *none of the unpleasant hospital features I found everywhere else*, and your kind consideration and correct treatment of my son will never be forgotten.

With sincere thanks, yours truly,

ERNST BILHUBER.

THE RECTORY, CHRIST CHURCH.

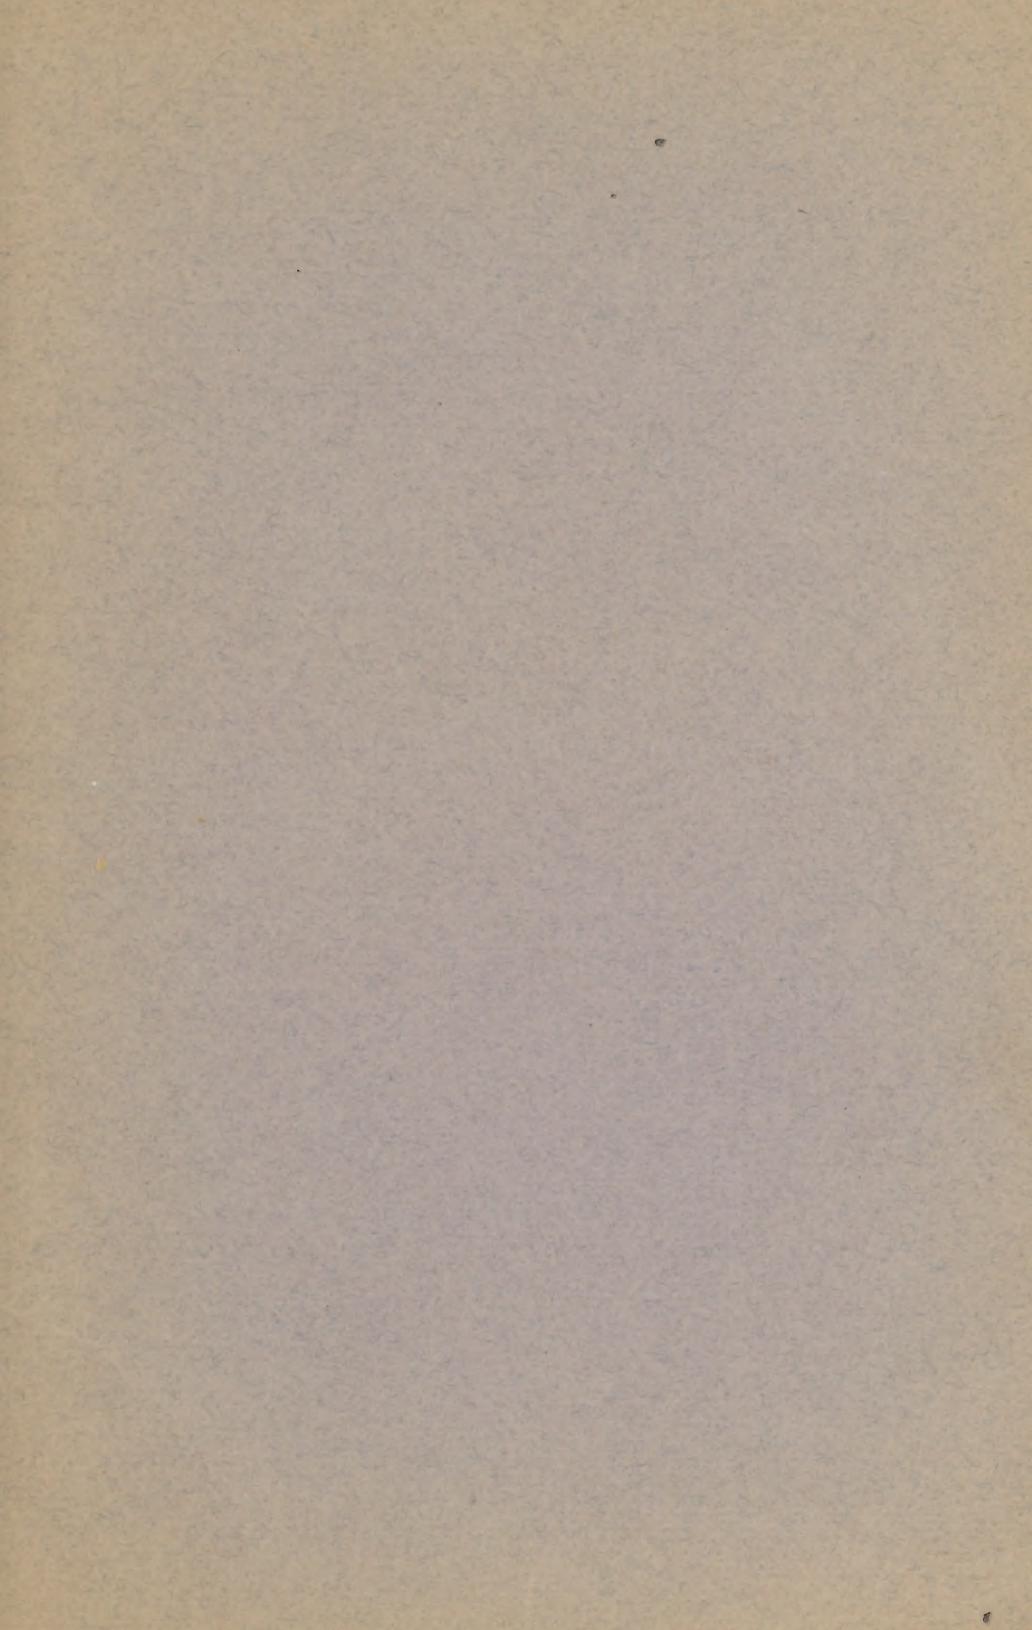

HORNELLSVILLE, N. Y., March 17, 1897.

I am acquainted personally with both the business and professional management of the Steuben Sanitarium. It has for the former, those who are among the most reputable and able business men in our city, and those in charge of the institution, physicians, etc., are also persons of unquestionable ability. Steuben Sanitarium is, we believe, in every way first-class.

(Rev.) EDWIN S. HOFFMAN,

Rector Christ Epis. Church.

Many more references can be given, if desired, from those having suffered from various diseased conditions who have been guests of the Sanitarium.

BARON STEUBEN.
